Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/721,895	Applicant(s) NIEDERBERGER ET AL.	
	Examiner Michael J. Araj	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-46 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 25-39 is/are allowed.
- 6) ☒ Claim(s) 1-24 and 40-46 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 28 February 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 6, 7, 10-12, 18, 19, 21, 40-43, 45 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wack et al. (U.S. Publication No. 2002/0156474).

Wack et al. disclose a bone plate (14) comprising an elongated shaft portion having a first width, a head portion connected to the shaft portion having a greater width along a common longitudinal axis, at least one partially threaded screw hole (22) located in the head and shaft portion where in at least one of said screw holes are configured to engage a head of a bone screw to form an angularly stable connection with the bone screw. The first and second screw holes include at least a partial peripheral groove (354) for engaging a head of a bone screw that is substantially wedged shaped. Wack et al. also disclose a third width that widens exponentially, the shaft portion being curved in the form of an elliptical arc along the longitudinal axis, and the shaft portion lying in a first plane that is substantially parallel to the head portion lying in a second plane (see Figure 11). At least one portion of the bone plate has a curvature that runs transversely to the longitudinal axis, where the curvature substantially runs over the entire length of the bone plate. The bone plate has an upper

surface and a lower surface where the first and second pair of holes are divided by a longitudinal axis causing one pair to be symmetric and the other being asymmetric. The head portion is connected to the shaft portion at a transition portion where one first pair of the first holes is located farther from the transition portion than the second pair of the first holes, and where at least one of the second holes defines a central axis that is substantially perpendicular to the longitudinal axis. Wack et al. disclose the claimed invention except the range of the thread pitch, plate thickness, elliptical arc with a major and minor axis, curvature of radius, acute angles and obtuse angles. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the bone plate of Wack et al. having the ranges as set forth in the disclosed claim, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Claims 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wack et al. (U.S. Publication No. 2002/0156474) in view of Schafer et al. (U.S. Patent No. 6,572,622).

Wack et al. disclose the claimed invention except for the plate having screw holes that are double threaded. Shafer et al. teaches a serrated or threaded edge (32) on two portions of the aperture (the flat flank (34) and the steep flank (36)) producing a double threaded screw hole. It would have been obvious to one skilled in the art at the time the invention was made to construct the plate of Weaver et al. with a double

threaded screw hole in view of Schafer et al., for facilitating screwing in the bone screw and prevent automatic unscrewing (Col. 3, lines 6-11).

Response to Arguments

Applicant's arguments with respect to claims 1-7 and 9-24 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 8 and 44 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 25-39 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Araj whose telephone number is 571-272-5963. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
